LE THI MY CHI

Software Testing Engineer

0347790574 mychi301215@gmail.com linkedin.com/in/lethimychi15 https://mychi.vercel.app

PROFESSIONAL SUMMARY

QA/QC Engineer with **1.5 years** of experience testing **Web, Mobile** and **Admin applications** across Indoor Navigation, **CRM**, **E-commerce**, Media/Advertising Sales and AI/Computer Vision domains. Strong in manual testing, **API testing**, **SQL database validation** and **Playwright automation**. Familiar with **Agile/Scrum** and experienced in **leveraging AI** tools to improve requirement analysis, test design, test report, **test automation** and testing efficiency.

SKILLS

- **Testing**: Manual Testing (Web, Mobile), Test Planning, Test Case Design & Execution, Test Reporting, Defect Management, API Testing, SQL Querying, User Guide Documentation.
- **Test Types**: Functional, UI/UX, Smoke, Sanity, Regression, Integration, Security, Cross-browser, Re-testing.
- **Automation**: **Playwright** (TypeScript), Selenium WebDriver, Appium.
- **API & Database**: **Postman**, Swagger, PostgreSQL, MySQL, MongoDB, **SQL**.
- **Tools**: GitLab, Jira, BrowserStack, DBeaver, Chrome DevTools, Figma, OWASP ZAP, Notion, Microsoft Excel, Google Sheets.
- **Programming**: TypeScript, **JavaScript**, HTML, CSS, C#.
- **Development Process**: SDLC, STLC, **Agile/Scrum**, Waterfall.
- **Soft Skills**: Communication, Analytical Thinking, Problem Solving, Attention to Detail, Proactive, Self-motivated.

EXPERIENCE

10/2025 - Present **TEANIS TECHNOLOGY AND SOLUTIONS JOINT STOCK COMPANY**

QA/QC Engineer

LWS Portal | Domain: Data Center / B2B Customer Lifecycle · Web · Admin

- Owned QA across 15+ sprints, designing and executing 2,000+ test cases across customer, sales and Data Center operational workflows.
- Uncovered multiple Major business-rule issues in complex Request, Permission and Approval workflows, including Permit to Work, Cross Connect, Remote Hand and Access Requests.
- Validated role-based access, multi-step approvals and API/database data using Postman and PostgreSQL, supporting releases across TST → STG → UAT → Production.

LWSn Portal | Domain: Facility Network / B2B Sales · Web · Admin

- Owned QA across 6 sprints, designing and executing 1,500+ test cases for the end-to-end Lead → Quote → Sales Order → Delivery → Renewal/Termination lifecycle across Singapore & Malaysia.
- Validated Margin-based pricing, approval rules and role/data permissions, uncovering business-logic issues affecting pricing and order processing across 2 markets.
- Tested document traceability, API/database data and regression scenarios, ensuring consistency across complex B2B sales workflows and supporting release validation.

Position Tracking | Domain: Indoor Navigation / Location-Based Services · iOS/Android · Web · Admin

- Owned QA across 3 platforms, executing 700+ test cases and identifying 50+ functional, UI, API and security defects across multiple release cycles.
- Automated smoke and regression tests using Playwright (TypeScript), leveraging ChatGPT, Claude, and Codex to assist with test script development, test scenario generation, and edge-case analysis.
- Validated real-time positioning, floor transitions and indoor wayfinding across TST → STG → UAT → Production, achieving zero critical regression defects.

3/2025 - 10/2025 **ITBEE SOLUTIONS TECHNOLOGY COMPANY LIMITED**

QC/Tester

Adex Digital Advertising | Digital Advertising / Media Sales · Web

- Executed 400+ test cases across Booking → Campaign → Contract workflows, identifying 70+ functional/UI defects.
- Tested Google Maps integration, including locations, markers, filtering and screen selection, ensuring accurate campaign/media placement.
- Collaborated with BA and Developers to verify fixes and support regression and release validation.

PROJECTS

4/2025 - 5/2025 **E-Commerce Platform for Online Cake Ordering**

A web-based e-commerce platform for online cake ordering, payment and order management.

Responsibilities:

- Analyzed SRS, BRD and Q&A documents to design and execute 200+ test cases.
- Performed Functional, UI/UX, Compatibility, Performance and Security Testing.
- Executed end-to-end testing for Login, Product, Cart, Checkout and Order Management.
- Reported and tracked 25+ defects using Jira and collaborated with developers to verify fixes.
- Conducted cross-browser and cross-device testing using BrowserStack.
- Developed automation test scripts using Selenium and Appium.

Tools Used: Selenium, Appium, BrowserStack, OWASP ZAP, Jira.

EDUCATION

2022 - 2026 **HO CHI MINH CITY UNIVERSITY OF INDUSTRY AND TRADE**

Bachelor of Information Technology - Graduated with Honors (Good Classification)

GPA: 3.41

Honors:

- Scholarship for Academic Good and Excellence
- Consolation Prize, Faculty-Level Student Scientific Research Competition, 2025
- Third Prize, University-Level Student Scientific Research Competition, 2025

Research topic: Computer Vision Project (Image Classification)

LANGUAGES

TOEIC 500 (LR), 200+ (SW)
